React -The Complete Guide 2023(incl. ReactRouter& Redux)

React Query: Server State Management in React

React Testing Library with Jest/Vitest

AWS Lambda & Serverless Architecture Bootcamp

Certificado Verificado de edX para el curso Analyzing and Visualizing Data with Excel

Héctor Biminchumo

Senior Full Stack Engineer | Agentic Coding Specialist | AWS Serverless | Node.js | ReactJS, Next.js | TypeScript
Perú

Extracto

I'm Héctor, a Senior Full Stack Engineer with 4+ years of experience building mission-critical web applications for the North American and Latin American markets. I specialize in Agentic Coding, leveraging autonomous AI environments (Claude Code, Cursor) to accelerate development cycles by 90% while maintaining the highest engineering standards. My approach combines a systems-thinking mindset—rooted in my Industrial Engineering background—with deep expertise in the MERN stack and AWS Serverless architecture. I don't just write code; I architect intelligent, scalable solutions that solve complex business logic.

Key Technical Milestones:

- Performance:** Reduced AWS Lambda execution time by 70% and improved frontend load times by 30% through strategic refactoring and memory optimization.
- Architecture:** Accelerated deployment cycles by 40% by implementing Micro-frontend architectures and decoupled backend services.
- Data & Ops:** Experienced in modernizing legacy systems and designing robust data pipelines using AWS (Step Functions, Glue) and Dagster.

My Technical Ecosystem:

- Languages & Frameworks:** JavaScript (ES6+), TypeScript, Node.js, NestJS, and Django (Python).
- Frontend Mastery:** React.js, Next.js, Micro-frontends, Tailwind CSS.
- Cloud & Infrastructure:** AWS Specialist (Lambda, SQS, DynamoDB, CloudWatch), Cloudflare, and Serverless Frameworks.
- Agentic Tools:** Expert-level proficiency in Claude Code and Agentic Workflows for autonomous debugging and refactoring.

Engineering Excellence: Clean Code, SOLID principles, and Test-Driven Development (TDD). I thrive in international, cross-functional teams where I can turn ambiguous requirements into well-structured engineering plans. Currently, I am focused on the intersection of AI-driven development and Fintech/Retail digital transformation. When I'm not orchestrating agentic workflows or optimizing cloud infrastructure, you'll find me dancing salsa or hitting the gym. I believe in maintaining peak performance—both in code architecture and in life. Let's connect if

you're looking for a disciplined, high-impact engineer to build the next generation of intelligent software!

Experiencia

Baufest

Full Stack Developer

febrero de 2022 - marzo de 2026 (4 años 2 meses)

Lima, Perú

Les Schwab Project | September 2024 - March 2026

- Dispatch modernizes legacy iSeries sales audit processes by migrating to AWS, ensuring all POS invoices and related transactions are validated, corrected, and enriched for downstream systems.
- Analyzed business and technical requirements to build the application in alignment with strict test-driven development (TDD).
- Reduced Lambda execution time by 70% through native Date API adoption (19x faster), memory preallocation (60% reduction), and p95/p99 performance testing framework.

Les Schwab Project | March 2024 - August 2024

- Implemented bug fixes and functionality enhancement by using react libraries, this helped us to implement automatic logout for idle users, which also improved security and a 30% increase in user satisfaction scores, measured over a two-month period.
- Implemented unit tests and increased test coverage from 0% to 45%, resulting in a 40% reduction in production bugs and improvement in code reliability.

Cencosud Project | February 2022 - January 2024

- Successfully implemented Micro-frontend architecture, resulting in a 40% reduction in deployment times and a 25% increase in development team productivity through improved modularity and parallel development.
- Optimized data fetching strategy by minimizing the use of the useEffect hook, resulting in a 30% reduction in load time and improved application performance.
- Introduced and enforced best practices for code quality and version control, resulting in a 40% reduction in codebase-related issues and improvement in overall maintainability and scalability.

- Successfully integrated 30 to 40 frontend components with 30 to 40 backend APIs, ensuring seamless data flow and enhancing the overall functionality of the application.

Grupo Socopur

Demand Planner

agosto de 2018 - julio de 2020 (2 años)

Distrito de Ate, Departamento de Lima, Peru

Planning spare parts import, managed a \$300K USD inventory, daily communication with customers and continuous trained to warehouse team.

Achievements:

- Increased sales by 500% through optimizing spare parts planning and enhancing regional distribution analysis.
- Reduced import goods checking time in the warehouse by 50% by developing comprehensive catalogs and implementing a new coding system.
- Led a team of 4 in inventory management, reducing physical inventory errors by 90% through meticulous checks and process improvements.

Scania del Peru S.A.

Finance and Administrative Assistant

2016 - 2018 (2 años)

Lima, Perú

Monitored accounts payables transactions and allocating funds to cash on all national branches, bought and sold foreign currency.

Achievements:

- Spearheaded the transition to a paperless practice by implementing an electronic booking system, cutting paper use by 80%.
- Automated repetitive tasks using Excel Macros/VBA, saving over 10 hours of analysis time per week.
- Standardized financial reports across all national branches by leading a 6-member team, ensuring consistency and accuracy.

Automotores Gildemeister SA

Planning Analyst

2015 - 2016 (1 año)

Lima, Perú

Empresas Indumotora

Planning Analyst
2014 - 2015 (1 año)
Lima, Perú

Derco
Planning Trainee
2012 - 2014 (2 años)

Educación

Ironhack
Full-Stack Web Developer Program - IronHack Bootcamp, Information
Technology · (octubre de 2021 - diciembre de 2021)

Universidad ESAN
Major in Corporate Finance · (2018 - 2019)

Universidad ESAN
Major in Logistic and Operations · (2015 - 2016)

Universidad Nacional Federico Villarreal
Bachelor of Engineering (B.E.), Industrial Engineering · (2009 - 2013)

Universidad Nacional Mayor de San Marcos
· (2013 - 2013)
